

Standard 11.4a : Community living

The MHS provides consumers with access to a range of treatment and support programs that maximise the consumer's quality of community living

Standard 11.4b : Supported accommodation

Supported accommodation is provided and/or supported in a manner that promotes choice, safety and maximum possible quality of life for the consumer

Created by Carole Myhill and Prue Campese, Tamworth Mental Health Support Group

Support is represented by the hands beneath the central house and by the other hands on the square leading to and from the different houses. The hands also represent the range of treatment, support services and programmes which maximise the consumer's quality of community living both from the MHS and other agencies. The bus indicates the importance of public transport to give choice in community living.
